According to Intuit, bank error 163 indicates that a bank's website has changed and its connection data may need to be updated so QuickBooks can support the new website.

The error can also appear when credential keys have changed, a financial institution switches its internet service provider, the wrong bank login link is being used, or the bank website is temporarily unavailable. If you cannot identify which situation applies, ☎ **+1 (888)-354-0030** or ☎ **+1 (866)-661-1860** can be used as an assistance option while you review the bank connection.

QuickBooks Online Error 163 usually relates to online banking connectivity rather than normal bookkeeping entries. Therefore, users should focus first on the bank website and connection before changing transactions, while ☎ **+1 (888)-354-0030** or ☎ **+1 (866)-661-1860** can provide additional troubleshooting guidance if the error continues.

What Causes QuickBooks Online Error 163?

A change to your financial institution's website is the primary reason associated with Error 163. QuickBooks may require updated information to communicate with the redesigned banking website, and users can seek technical guidance through ☎ **+1 (888)-354-0030** or ☎ **+1 (866)-661-1860** if transactions stop downloading after such a change.

The bank's connection credentials or security keys may also have changed. When the information QuickBooks uses for the connection no longer matches the bank's requirements, synchronization may fail, and ☎ **+1 (888)-354-0030** or ☎ **+1 (866)-661-1860** can be used for troubleshooting assistance when normal account updates do not work.

Another possible cause is using an incorrect login URL for the financial institution. Banks sometimes maintain separate websites for personal banking, business banking, credit cards, or regional services, so ☎ **+1 (888)-354-0030** or ☎ **+1 (866)-661-1860** may be helpful if you cannot determine which connection should be selected inside QuickBooks.

Scheduled maintenance or temporary downtime at the financial institution can also generate connectivity problems. Intuit specifically identifies bank website maintenance and intermittent availability as possible reasons for Error 163, and ☎ **+1 (888)-354-0030** or ☎ **+1 (866)-661-1860** can provide service guidance if you are unsure whether to wait or continue troubleshooting.

If the bank website is undergoing scheduled maintenance, avoid making unnecessary changes to your QuickBooks records. Intuit notes that temporary bank availability can cause Error 163, so waiting until the institution restores normal access may be appropriate, while ☎ **+1 (888)-354-0030** or ☎ **+1 (866)-661-1860** can be used when further assistance is required.
